

“ NANOTECH ~~will change~~: MEET THE FUTURE! ”
BY PAT / SALTY

NANOTECH IS AND WILL BE THE NUMBER ONE CENTRAL BREAKTHRU THAT WILL SHAPE THE FUTURE, BAR NONE.

I CAN NOT THINK OF ANY PAST HISTORICAL BREAKTHRU TO EQUAL IT. IT LITERALLY WILL CHANGE EVERYTHING, THE ENTIRE WORLD AS WE KNOW IT. IT WILL EVENTUALLY - HOW LONG? WHO KNOWS EXACTLY? - BUT EVENTUALLY IT WILL ALLOW DISEASES TO BE FOUGHT, NEUTRALIZED, AND - YES! - DEFEATED DOWN ON THEIR OWN LEVEL (THE MICROSCOPIC LEVEL).

EVENTUALLY, BRIDGES AND TUNNELS AND BUILDINGS WILL BE ABLE TO BE BUILT FROM THE BOTTOM UP ~~FROM THE BOTTOM~~ (FROM THE SMALL NANO LEVEL UP RATHER FROM THE SLOW, LONG, HARD WAY AS IS DONE NOW, AND HAS ALWAYS BEEN DONE).

NANOTECH, AND ITS VARIOUS BREAKTHRUS, WILL BE THE ULTIMATE KEY IN MANKIND'S ULTIMATE EVOLUTIONARY ROLE AS MATERIAL MANIPULATOR # ONE ON THIS PLANET. IT WILL BE THE ULTIMATE ENVIRONMENT CHANGER, MORE SO THEN ALL THE EARTHMOVERS & BULLDOZERS & CRANES IN THE WORLD TIMES ONE MILLION.

(2)

The POST NANO WORLD will be so different than the PRE NANO WORLD that future generations will mark it as such; POST NANO AND PRE NANO, much as history - in the western world - is divided into post B.C. and pre B.C. Will it all be good?

Of course not - sense when was it EVER? It will offer - as breakthrough technologies always do - new weapons and weapons systems, also. And - sad to say - inevitably, because technology simply is - the uses any technology can be put to - whether good or bad - is MANKINDS responsibility.

But - that said - it will be only the most technologically ADVANCED countries that will be on the cutting edges of nanotech; the DISPARITY BETWEEN the haves and the have not societies - between the richer more advanced countries (for instance) and the so called undeveloped or "third world" nations, will only become even more pronounced in the post nanotech age. There can be little - if any - doubt of that, so invest in the TOP BEST NANO TECH STOCKS; They ARE the future!
