

"SHOULD SCIENCE CREATE ARTIFICIAL LIFE?"

By PAT/SALTY

AND my ANSWER is; IT ALREADY EXISTS!
ARTIFICIAL LIFE.

HOLLYWOOD is LOADED WITH IT.
WITH ARTIFICIAL LIFE FORMS.

WASHINGTON, D.C., ALSO.

NUMEROUS EXAMPLES OF ARTIFICIAL
LIFE FORMS - ENTIRE COLONYS, IN FACT -
CAN be FOUND ON MADISON AVENUE,
WALL STREET, AND THE MASS MEDIA.

YET COMPARITIVELY FEW OUTSIDE OF
THE ABOVE LISTED AREAS.

you KNOW, LIKE IN ALL THE AREAS

REAL people LIVE AND WORK IN.

THIS IS BECAUSE ARTIFICIAL LIFE FORMS
- UNLIKE REAL LIFE - DO NOT SEEM TO

TAKE TO REAL LIFE WORK ENVIREMENTS.

IT SEEMS TO BE A NATURAL BIOLOGICAL
WEAKNESS ARTIFICIAL LIFE FORMS HAVE.

TO HARD WORK.

TO REAL PEOPLE WHO HAVE TO DO REAL
EVERYDAY WORK IN ORDER TO SURVIVE.

NO; ARTIFICIAL LIFE HAS TO HAVE

ARTIFICIAL ENVIREMENTS TO SURVIVE

AND PROSPER AND REPRODUCE. OR ELSE,

LIKE GERMS, THEY WILL DIE - "RRRRRR" XX
